(54) INFORMATION PROCESSING DEVICE AND DISPLAY CONTROL METHOD

(57)Abstract:

PROBLEM TO BE SOLVED: To enable display by sectioning pages in accordance with size of a display screen on a browser and switching a screen for each page by linking each item information based on tag information and dividing linked each item information as a file with a page unit.

SOLUTION: A display section 18 is described with a specific language, and displays information to which plural item information are related by tag information. A link means links each item information based on tag information. A screen size recognizing means recognizes the present screen size. A page dividing means divides each item of information linked by the link means as a file with a page unit in accordance with a screen size recognized by a screen recognizing means. A display control section 17 displays each item information divided by the page dividing means on a display section 18 for each page. A CPU 11 controls whole device, and performs display control of information obtained on a browser.
